Dear Sir/Mam

SUBJECT: PLASTIC BUCKET TOILET

This refers to the above,

I am writing this letter about health conditions that caused by this bucket plastic toilet containers.

When it is hot they become hotter, during the night is dark as there are no lights in the toilets.

Mosquitos and spiders bite us and lot of fly inside the toilet after they go inside the house.

The chemical is not healthy when mixed with faces when we cook flies are coming to our food and those flies are and damages our food

I discovered that since he had these toilet s we have sickness such as allergy, TB, tighford, flue and our kids sleep during school hours. We do not get visitors because they are afraid of the smell

The toilet fall when it is windy and when heavy rains water fills them up.

They are easy to be stolen

Someone had to go to the doctor because a spider beat him...

We are always at the clinics because of the sickness we get from these toilet and we make traffic

We are not safe at all; we do not call it a rest room we calling it a smelling zone.

Neighbour fight a lot because of these toilets because 20+- people have to share the toilet and sometimes if the neighbour is not in he/she locks the gate or locks the toilet.

Renting cleaning and draining these toilets is very expensive. According to our vision we want a flushing toilet at least 4 each street or 3 each street because we have a main whole sewer pipes in our section ext8.

That vision will help our municipality with the budget and eliminate the damage that we have

The reason behind is that these toilet stay for 3 days or 2days according to research but these ones stays for more than 2 or 3 years and that makes the dignity of a black person go down and they don't feel free for their freedom, bucket system of apartheid was better that what we have now.

We are deeply and humbly requesting for your help and assistance PLEASE! Can we have flushing toilets in our section at least 4 per street we hope and trust that our request will be successful so that we can be healthy and happy like everyone
