**SOUTH AFRICA OPENS DOORS FOR CHICKEN IMPORTS
FROM THE UNITED STATES**

The Minister of Trade and Industry said South Africa will end punishing duties on US chicken and renew imports.

South Africa imposed 100% duties on the dumping of certain chicken portions. Removing those import barriers opened a market that had been closed for the past 15 years. This decision was within the tolerance of the South African poultry industry.

The products to be imported will be mainly the cuts that are not favoured by the US consumer. South Africans consume more chicken than people in any other African country and local producers have struggled to keep up with the rising demand.

The agreement, which would see the US emerge as one of the top poultry exporters to South Africa, should help smooth the passage of the (American) African Growth and Opportunity Act (AGOA). AGOA is a trade initiative providing duty-free treatment of US imports of certain products.

[Adapted from *Mail & Guardian*, February 2016]

LIVING STANDARDS – SOUTH AFRICA					
HOUSEHOLDS					
FORMAL HOUSING		USE ELECTRICITY		PIPED WATER	
1996	2015	1996	2015	1996	2015
5,8 million	12,4 million	5,2 million	14,1 million	7 million	14 million

The data shows the relative success of the government's service delivery efforts despite continuing backlogs and the fact that in many cases the quality of services delivered should have been higher.

Another conclusion is that state-driven service delivery efforts have probably gone as far as they can conceivably go and future improvements in living standards will be driven more by labour market access and levels of economic growth than by the efforts of state planners.

SA ECONOMY CLOSING IN ON A RECESSION

South Africa's economy is at risk of falling into a recession, the World Bank said, as it cut the nation's growth forecast for this year to 0,8%.

Growth in Africa's third-largest economy is under pressure, following a slump in commodity prices, weakening demand from China and the worst drought in more than a century.

The rand has plunged 14% against the dollar in the past three months as sentiment worsened and credit-rating companies (Moody's, Standard & Poor's and Fitch) downgraded the country's credit rating because of growth risks.

South Africa is projected to remain largely below the average growth rate of 4,5% for sub-Saharan Africa in 2016 to 2017.

Against this backdrop, poverty in South Africa is set to rise as incomes fall.
